

HERE COMES THE NEW LEADER OF THE PACK!

AMIDAR

The hottest video package since you know what!

The GORILLA picks up coconuts to capture territory while avoiding the attacks of AMIDARS. When the Amidars close in, push the jump button to make them leap and the gorilla passes under only three jumps per level.

When the coconuts are gone, on to the next level! Now, the gorilla can throw the Amidars off the trails with a head on collision while still scarfing up the coconuts. The first kill is worth 200 points. The others multiply by 2 up to 1600 points.

When all the coconuts have been gobbled, THERE'S A BONUS! A PIG, yes, a pig appears and randomly runs the maze while the player hits the jump button. If the pig retrieves the fruit at the end of the maze, 5000 BONUS POINTS go to the player.

The last level of the game has the Amidars still chasing as the player applies the PAINT ROLLER around each square to capture territory. Only squares adjoining the already-painted squares can be painted, which awards the player points.

Finally, the player reaches into his pocket, takes out another quarter and repeats the process time and time again. And you're the one who receives this bonus because
